CONSENT TO COLLECT PATIENT INFORMATION

This medical practice collects information from you for the primary purpose of providing quality health care. We require you to provide us with your personal details and medical history so that we may properly assess, diagnose, treat and be proactive in your health care needs. We will use the information you provide in the following ways:

- 1) Administrative purposes in running our medical practice.
- 2) Billing purposes, including compliance with Medicare and Health Insurance Commission requirements.
- 3) Disclosure to others involved in your health care, including treating doctors and specialists outside this medical practice as advised by you.

I understand the reasons why my information must be collected.

I understand that I am not obliged to provide any information requested of me, but that my failure to do so might compromise the quality of the health care and treatment given to me.

I am aware of my right to access the information collected about me, except in some circumstances where access might legitimately be withheld. I understand I will be given an explanation in these circumstances.

I understand that if my information is to be used for any purpose other than the above, my consent will be sought.

I consent to the handling of my information by this practice for the purposes set out above, subject to any limitations on access or disclosure of which I may notify this practice.

Signed _____ Date: _____

Patient Name (Please print) _____

**CONSENT FOR COLLECTION AND USE OF
 PHOTOGRAPHS AND PATHOLOGY**

Comparing before and after photographs is a necessary part of establishing the efficacy of a given treatment. Prior to any surgical or non-surgical procedure, photographs will be taken and stored in a confidential and secure manner.

It can be very helpful for other patients to see previous results when considering surgery. We understand the importance of protecting your privacy. As such, any photography approved by you for use will ensure you are not identifiable. The de identification process includes blurring distinctive facial features not relevant to the results, removing distinctive skin markings such as freckles, moles or tattoos.

If you do decide to allow your images for any of the purposes listed below, you will retain the right to review and approve the images before they are published or used in any capacity. If you wish to withdraw this photography consent at any time, you are able to do so.

Please answer Yes or no to the below uses

I permit Dr Matousek to use de-identified (pre and post operative) photos of myself. By de-identified this means blurring distinctive facial features not relevant to the results, removing distinctive skin markings such as freckles, moles or tattoos and also allowing you to approve the photos prior to publication.

- | | | |
|---|-----|----|
| a) on the business website | YES | NO |
| b) social media platforms | YES | NO |
| c) in clinical research papers published in journals and presentations at
surgical conferences (only seen by other surgeons) | YES | NO |
| d) to show other patients coming for consultation (in rooms only, no ongoing
access to your images) | YES | NO |

The next section pertains to pathology and radiology results which are completely deidentified. This include pathology (histopathology microscope slides) and radiology results (mammograms/CTs/ MRIs) in published research papers (seen only by other surgeons in scientific journals). YES NO
